

# The Soniks™

From Happy Dog® Toys

You have to see this family to believe it because YOU WON'T HEAR THEM! The Soniks have arrived to revolutionize the squeaky dog toy forever with their exclusive Silent Squeak™ technology only dogs can hear. The whole family contains an ultrasonic squeaker that emits sound in a range above the hearing range of humans but just right for playful, squeak-happy dogs! Introduce your dog to the silent yet spunky Sonik Family: Proud parents SubSonik and SuperSonik, trendy and playful teenagers UltraSonik and HyperSonik and the trusted family pets Woofer and Tweeter. Their signature no NOYZ emblem lets owners know that peace and quiet has landed in their home!

## Silent Squeak™

Human hearing ranges from 20Hz to 25,000Hz while dogs can hear sounds ranging from 67Hz to 45,000Hz (ranges vary slightly from breed to breed). Happy Dog Toys' Silent Squeak™ ultrasonic squeaker produces a sound with a frequency range of 25,000Hz to 35,000Hz—above the audible range of humans, but well within the hearing range of dogs.

### SubSonik

The slow, silent and lovable head of the spaceship.

• Item: 93541

### SuperSonik

Organized and in control, this super mom keeps everything running smoothly with one silent squeak.

• Item: 93542

### Tweeter

This family pet keeps one eye open for anyone who wants to play.

• Item: 93546

### UltraSonik

Like, totally cool, this spunky teenager can squeak your dog's ear off.

• Item: 93544

### HyperSonik

The mischievous and pesky little brother creates quite a commotion without making a sound.

• Item: 93543

### Woofer

The Soniks beloved "watch dog" with a faithful ultrasonik bark.

• Item: 93545
